Healthy Steps to Better Urinary Health

Join us for an informative seminar presented by Best Choice Home Care focused on understanding Urinary Tract Infections (UTIs) in older adults.

Learn about common signs and symptoms, what to watch for as we age, and the importance of early detection. We'll also discuss simple prevention strategies, including proper hydration, good hygiene practices, and ways to help maintain overall urinary health.

Early detection and prevention can help keep you healthy, comfortable, and feeling your best. Residents and their loved ones are encouraged to attend! Heart-healthy refreshments will be provided.
